SUNRAY PROPERTIES II- BUSINESS RENTAL SPACE
SITE PLAN
42 WEST 300 NORTH
CITY COUNCIL MEETING
NOVEMBER 21, 2019

ZONING- M-1 Light Manufacturing

UTILITIES- All available near site. They will be brought in from Center street. They will need to obtain a utility easement from Kelton Wilcox.

PARKING & ROADS- Access to the new building will be from two existing accesses. Asphalt will be added as shown.

LIGHTING- See electrical plan

LANDSCAPPING- Already existing at the entrance to this property.

STORMWATER- Some existing as shown. New pond will be added on the north property line.

SIGNAGE- Existing

FENCING- Five-foot-tall concrete fencing proposed on the north and east. May want to considering requiring fencing along the west & south sides also, at least by the parking area next to the residential property.

NOTES- They are building this building to provide space for rent for other businesses. This is similar to what they have done with the original building. They have been a great addition to the city and have always kept their property well maintained. Where this property is mostly up against other manufacturing property, this seems like a good location for expansion as long as the residential area is reasonably buffered. The Planning Commission recommends approval with the following conditions: 70' privacy fencing be added along west side bordering residential lot, utility easement obtained from Kelton Wilcox, & final storm water drainage system approved by City engineer.
